

Observational data life cycle through JMMC services

Prepare Observations

SearchCal

SearchCal interface showing search parameters and results for instruments like ASPRO.

ASPRO

ASPRO interface showing observation configuration and a map of the observation field.

Reduce data

Reduce data interface showing data reduction parameters and resulting spectra.

amdlib

amdlib interface showing data reduction results.

pndrs

pndrs interface showing data reduction results.

View Data

View Data interface showing a plot of TPHI (deg) vs SPATIAL EXTENT (MA).

OIExplorer

OIExplorer interface showing a plot of TPHI (deg) vs SPATIAL EXTENT (MA).

CDS Catalogs

CDS Catalogs interface showing a list of astronomical objects with various filters and search options.

Fit Models

Fit Models interface showing model fitting parameters and results.

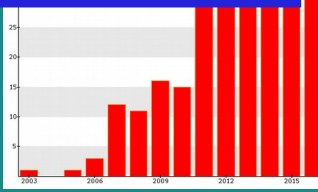

LITPro

LITPro interface showing data reduction and fitting results.

+ Training

+ User Support

+ OLBIN forum
And Publications

JSDC

JMDC

JSDC and JMDC interfaces showing data management and search capabilities.

OiDB

OiDB interface showing search filters and results for observations.

L0 to L3 DataBases

L0 to L3 DataBases interface showing data reduction levels and availability.

Reconstruct Images

Reconstruct Images interface showing the reconstruction of astronomical images.

OImaging

OImaging interface showing image reconstruction results.
