

WELCOME IN GOUTELAS!...

**Euro Summer School: Observing and Data Reduction
with the Very Large Telescope Interferometer**

Goutelas, 5-16 June 2006

School objectives

- Part of a cycle of 4 European schools (cf. talk by P. Garcia)
- The objectives of this school is to train participants to the use of the VLTI instruments AMBER & MIDI
- Organised as follows:
 - Lectures (theory, general presentation,...)
 - Tutorials (illustrated interferometry, related to practice sessions)
 - Practice sessions with real VLTI software
 - Illustrated seminars by specialists with actual results

- The 2 weeks organized as follows:
 - Preparation observations (1st week)
 - Data reduction and model fitting (2nd week)
 - Personal projects at the end of each week
 - Poster session on Thursday afternoon
- Local web site:
`http://vltischool (.obs.ujf-grenoble.fr)`
- Speakers from interferometry community

Practical aspects

- Laundry
- Free day on Sunday (picnic possible, tourist guides available,...)
- Internet available on wifi and in the computer room (limited bandwidth)
- ...

If any questions, please do not hesitate to ask...
